

For the upcoming discussion task, please take the role of **Festival Organiser**.

Your goal is to represent feasibility, logistics, and the ability to actually run the event.

You **strongly prefer** this planning step:

- Secure the festival venue and stage setup
 - *Example reasoning:* Without a confirmed venue and infrastructure, the festival cannot legally or practically take place.

You **strongly prefer NOT to** start with:

- Book headline and supporting acts
 - *Example reasoning:* Booking artists before securing a venue creates logistical risks and may lead to cancellations or incompatibilities.

During the discussion, advocate for the planning step that best supports this perspective.

Available Planning Steps

1. **Book headline and supporting acts** – secure performers who will attract an audience
2. **Secure the festival venue and stage setup** – arrange a location and basic infrastructure
3. **Promote the festival and sell tickets** – ensure awareness and generate attendance
